# Annex 2

## Ireland/UK Planning Principles for the of 700 MHz DTT Clearance

1.1 Ireland and the UK have met to discuss the potential technical issues arising from the international co-ordination of re-planning the DTT plans in the event of a 700 MHz DTT clearance.

1.2 Based on discussions, Ireland and the UK have determined that the following principles would provide a basis for carrying out technical exercises.

| **Requirements** | **IRL** | **UK** |
|---|---|---|
| **Layers** | 6 layers<br>3 PSB / 3 COM | 6 layers<br>3 PSB / 3 COM |
| **Coverage** | 98.5% PSB / 90% COM | 98.5% PSB / 90% COM |
| **Use of channel 38** | PMSE | PMSE |
| **Use Ch 48** | Yes | Yes |
| **Initial number of Sites (more may be required depending upon coverage)** | 64 PSB | 1156 PSB |
| **Initial Mode for planning** | DVB-T | 5 x DVB-T and 1 x DVB-T2 |
| **Regionality** | No requirement | PSB Regionality |
| **Receiving Antennas** | Grouped antennas | Grouped antennas |
| **Systematic Channel grouping** | If possible | If possible |
| **NI MUX / Overspill** | Requirement continues | Requirement continues |
| **Planning approach** | Main stations<br>Priority 1 Relays/NI<br>Priority 2 Relays<br>(Ireland consider UK LTV to be planned after IRL Priority 2 sites) | Main stations<br>Priority 1 Relays/NI<br>Priority 2 Relays/LTV |
| **NR Zone** | Yes (see section 1.10) | Yes (see section 1.10) |
| **Interference propagation Model** | Initial analysis to be carried out using ITU Rec 1546 1% Time, 50% Loc. Verified with further terrain based models in ICS telecom<br>(with coverage of the wanted to be taken into account) | Initial analysis to be carried out using ITU Rec 1546 1% Time, 50% Loc. Verified with further terrain based models e.g. UKPM<br>(with coverage of the wanted to be taken into account) |
| **Record of Antenna Templates** | 1 degree resolution PLT | 1 degree resolution PLT |
| **Exchange of technical data** | CEPT TVD | CEPT TVD |
| **Preferred service Area** | Based on best server areas of Saorview network | DPSA |

# Annex 2

1.3 It is recognised that the planning and restrictions for the template may be closer to the real pattern without compromising the antenna build or existing antenna. This will need to be determined in a pragmatic and co-operative manner.

1.4 Position of PLT template file name in the CEPT TVD. The template name is within the 'Remarks/Unused' field 44 of the TVD file, at start of column 565, and column width 48. (PLTFileName 565,48)

1.5 Naming format used for data exchange of PLT antenna templates. 'Rights' templates are named as below. 'Optimisation' templates are as named below with the acronym 'OP' added at the end of the template name. The optimisation template is a combination of the 'Rights' restrictions and the 'Optimisation' restrictions. Optimisation templates can be used in 'Realistic' coverage assessments.

**PLT naming convention (filename.plt):**
**Country codes**, **Site ID**, **Group or Channel** (if channel specific**) P/C/N** (P =PSB, C=COM, N = NI MUX), date **YYMMDD**
Examples:
**GI10700_03C160514** is a **Rights template**, UK towards IRL, station ID is 10700, on group 3, a commercial multiplex with the PLT file created or modified on the 14th May 2016.
**IG19131_21P160624_OP** is an **Optimisation template**, IRL towards UK, station ID 19131 on channel 21, a public service broadcast multiplex with the PLT file created or modified on the 24th June 2016.

### 1.6 Standard Frequency Groups for the planning of 700 MHz clearance

| UK/IRL Channel Groups | | | |
|---|---|---|---|
| **1** | 21 | 24 | 27 |
| **2** | 22 | 25 | 28 |
| **3** | 23 | 26 | 30 |
| **4** | 29 | 31 | 37 |
| **5** | 32 | 34 | 35 |
| **6** | 33 | 36 | 48 |
| **7** | 39 | 42 | 45 |
| **8** | 40 | 43 | 46 |
| **9** | 41 | 44 | 47 |

| Option Groups | | | |
|---|---|---|---|
| **3A** | 23 | 26 | 29 |
| **4A** | 30 | 31 | 37 |
| **6A** | 32 | 33 | 48 |
| **7A** | 40 | 42 | 45 |

### 1.7 Ireland and UK DTT Network Implementation

Both countries have co-ordinated rights for a 6 MUX network. The implementation of the networks is indicated in the co-ordination spreadsheets IRL TECH03 (column "MUX") and document 02(16), and UK TECH04 (column "Roll-out").

In respect of UK and Ireland services, the co-ordination spreadsheet indicates that a number of assignments are currently not planned to be implemented. Prior to any change to either country's implementation as indicated in the spreadsheets, Ireland and the UK will inform each other of their intentions as early in advance as practicable.

For the below two sites, prior to Ireland implementing more than four multiplexes, they will inform the UK of their intentions two years in advance, where practicable.

- In respect of Kippure, the co-ordination spreadsheet indicates that Kippure will not use Group 2 in the foreseeable future, but will instead use CH48. Therefore, based on Ireland's preference for a 2/3/4 MUX plan, it was deemed possible for the UK to plan relay stations based on the 4 MUX plan rollout requirements.

- In respect of Clermont Carn, the co-ordination spreadsheet indicates that Clermont Carn will use the following channel configuration: 42, 45 for the 2-MUX plan; 39, 42, 45 for the 3-MUX plan and 39, 42, 45, 36 for the 4-MUX plan. Ireland intend to use channel 48 only in a 6-MUX Plan implementation.

**Non-Relevant (NR) Zones**

IRL and UK agreed to the following list of non-relevant sites for the 700 MHz DTT clearance plan, Table 1.

**Table 1:** List of non-relevant sites in the development of the 700 MHz DTT clearance plan

| Ireland | UK | | |
|---|---|---|---|
| Bantry | Aldeburgh | Guildford | Ramsgate |
| Cahirciveen | Angus | Hannington | Reigate |
| Casla | Belmont | Hastings | Rosemarkie |
| Clifden | Bluebell Hill | Heathfield | Rowridge |
| Clonmel | Bromsgrove | Hemel Hempstead | Sandy Heath |
| Cnoc an Óir | Chatton | Jersey | Sudbury |
| Knockmoyle | Crystal Palace | Keelylang Hill | Tacolneston |
| Michelstown | Dover | Knockmore | Tunbridge Wells |
| Mount Gabriel | Dover Town | Lark Stoke | Ventnor |
| Woodcock Hill | Durris | Margate | Waltham |
| | Eastbourne | Midhurst | West Runton |
| | Fenton | Newhaven | Whitehawk Hill |
| | Gorleston | Nottingham | |
| | Guernsey | Olivers Mount | |
| | | Oxford | |

# Annex 2

### 1.8 Below Threshold (BT) Sites

Sites that were found to be below the GE06 agreement co-ordination threshold (BT) do not need to be submitted for co-ordination. BT stations with an ERP of 250 Watts or greater are shown in Table 2.

**Table 2:** Sites that are 250 Watts or greater and below the GE06 agreement co-ordination trigger threshold (BT sites)[1]

| IRL | UK | | | |
|---|---|---|---|---|
| Casla | Aldeburgh | Felixstowe | Knockmore | Rosemarkie |
| Clonmel | Bexhill | Fenham | Lark Stoke | Rouncefall |
| Cnoc an Óir | Bluebell Hill | Fenton | Larne | Rumster Forest |
| Dingle | Bressay | Fetlar | Lowestoft | Saddleworth |
| Knockmoyle | Bridlington | Findon | Malvern | Salisbury |
| Mitchelstown | Brierley Hill | Gartley Moor | Margate | Sandy Heath |
| Tonabrocky | Broadstairs | Gorleston on Sea | Midhurst | Sheffield |
| | Bromsgrove | Great Yarmouth | Mynydd Machen | Slapton |
| | Budleigh Salterton | Guildford | Newhaven | Stanton Moor |
| | Burnham | Haltwhistle | Newton | Sudbury |
| | Burham on Crouch | Hannington | Nottingham | Swinster |
| | Chesterfield | Hastings | Olivers Mount | Tacolneston |
| | Clacton | Heathfield | Penicuik | Tunbridge Wells |
| | Collafirth Hill | Hemel Hempstead | Plympton | Ventnor |
| | Crystal Palace | Hertford | Pontypool | Wells Next the Sea |
| | Dover | Keelylang Hill | Pontypridd | West Runton |
| | Dover Town | Kidderminister | Poole | Weymouth |
| | Eastbourne | Kings Lynn | Ramsgate | Wharfedale |
| | Eyemouth | | Reigate | Whitehawk Hill |
| | | | Rhondda VP | Winterborne Stickland |
| | | | Rosehearty | |

### 1.9 Additional NR sites for 700 MHz planning

Sites above the co-ordination trigger threshold deemed non-relevant (NR) for the purposes of the 700 MHz DTT clearance planning.

**Table 3:** Additional NR sites for 700 MHz DTT clearance planning

| IRL | UK | |
|---|---|---|
| Bantry | Angus | Waltham |
| Clifden | Belmont | Bristol Ilchester Crescent |
| Kilkeaveragh | Chatton | Bristol Kings Weston |
| Mount Gabriel | Durris | Chesterfield |
| Woodcock Hill | Oxford | Idle |
| | Rowridge | |

[1] Calculated using ITU-R 1546, assuming channel 21 (474MHz), Typical max ERP at site with an omni directional antenna and the co-ordination trigger value of 21 dBµV/m.

# Annex 2

## 1.10 NR Zone Map

Figure 1 below shows the locations of all relevant sites for the 700 MHz DTT clearance plan with an ERP of 250 Watts or greater. The colour codes for the stations are shown in Table 4.

| **Table 4:** Colour code for sites in Figure 1 | |
|---|---|
| Blue | Sites below the co-ordination threshold (BT) |
| Orange | Sites that are above the co-ordination threshold but a deemed to be non-relevant for the purposes of the 700 MHz clearance plan (NR sites) |
| Green | IRL relevant sites |
| Red | UK relevant Sites |

From the above tables a non-relevant zone for IRL and the UK was drawn on Figure 1, this new NR zone is shown by the solid black line. For comparison a dotted line was drawn to show where the NR zone from 2005 is different from the new NR zone.

**Figure 1:** NR Zone Map

---

Annex 3 and Annex 4 to this MoU provide supporting information relating to the technical parameters set out in Annex 1. Station types and Multiplex types were allocated during planning and recorded in the co-ordination spreadsheets Annex 3 and Annex 4. Actual allocation of the Multiplex will be determined by the Administration as required.

For information:

Station types are defined as: A/M = Main station, B1 = High Priority/Power Relay Station, B2 = Relay Station, L = Local TV Station

Multiplex types are defined as: PSB = Public Service Broadcast, COM = Commercial Broadcast, LTV = Local Television Service, RNI = Northern Ireland Multiplex
