# **Irish Telephony Numbering Scheme Status Report**

**December 2003** 

Document No:	03/143R
Date:	03, December 2003

#### 1 About this Document

This document lists the current designation or allocation status of numbers and codes within the Irish telephony numbering plan in summary form. It updates and replaces the previous version of this document - ODTR 02/84, issued in October 2002. It takes account of ODTR Decision Notices D1/99, D2/99 and D11/01 (document numbers ODTR 99/24, ODTR 99/29 and ODTR 01/58 respectively). In addition the document also takes account of designations and allocations that have occurred since the release of ODTR 02/84. Note: Minor error corrections made May 2004.

# 2 The Numbering Plan

The Irish telephony numbering plan is made up of all numbers which may be dialled on a publicly available electronic communications network in Ireland and which are used to establish telephone calls. The telephony-numbering plan is managed and administered by the Commission for Communications Regulation as a public resource on behalf of the State, in accordance with Regulation 22(1) of the new Framework Regulations<sup>1</sup>.

#### 3 Contents of This Document

The Commission is required under Regulation 22(5) of the new Framework Regulations<sup>1</sup>, to publish details of the national numbering scheme from time to time, and significant subsequent additions or amendments thereto. This document lists the purposes for which the various numbers within the national numbering plan have been designated. The information relates only to access codes or short numbers for the first five digits dialled. Subscriber numbers and numbers which contain additional characters, such as \* and #, are not included. Detailed information about other elements of the numbering scheme is available on the ComReg web site<sup>2</sup> at http://www.comreg.ie, or within the National Numbering Conventions, currently ComReg doc.02/107.

The status of each number type is correct at the date this document is issued. The numbering scheme changes on an ongoing basis and changes that occur after the issue date will be reflected in future versions of this document

#### 4 Conditions of Allocation

This document is for information purposes only; conditions that apply to designations or allocations are not shown. No entitlement to the use of any access code or subscriber number shall accrue as a result of the issue of this document, whether or not that code or number is included in this document.

1

ComReg 03/143R

<sup>&</sup>lt;sup>1</sup> European Communities (Electronic Communications Networks and Services) (Framework) Regulations 2003, S.I. No. 307 of 2003

<sup>&</sup>lt;sup>2</sup> For example, information on number allocations is available in numbering databases on the web site.

### 5 Emergency Services

Two short numbers (112 and 999) have been designated to provide access to State Emergency Services. Both numbers provide connection to the same service, however 112 represents a harmonised emergency number in use throughout the European Union.

## **6 Explanation of Tables**

Code

can mean an access code which would be followed by a subscriber number (e.g. 021 for Cork), or a complete short number (e.g. 118XX for Directory Enquiries). The codes listed vary in length from 2 to 5 digits.

Status

- A means the code has been allocated or designated for a specific purpose.
- R means the code is reserved for a specific purpose, but is not in use.
- C means the code is currently in use but subject to change. The change may be a full recovery of the access code or a change to the subscriber number.

Where numbers are changing, the date for the change is also provided. This is the date at which parallel running for these numbers ends.

Free means the code is not in use, and is available for future allocation or designation.

Subscriber No. Length

Where two figures are shown, with an asterisk against the second, this represents an imminent or ongoing change from the first number length to the second.

Access Code	Status	Allocation/Designation	Subscriber	Notes / Further Information
	A	NT / 1 A	No. Length
